

Piling and Foundation Specialist Federation of Australia and Deep Foundations Institute of the USA Joint Conference

Call for Abstracts

The PFSF and DFI combined resources to successfully produce their inaugural conference held in Melbourne in 2017. We are now inviting abstracts for the 2nd PFSF/DFI conference to be held in Sydney in March 2020. This follow-up conference is intended to promote all aspects of the deep foundations, retention and ground improvement works.

Authors are invited to share their experiences and knowledge encompassing aspects of design, construction and performance (or lack of) for building and infrastructure works.

The site will be open to receive submissions starting 20 March 2019, and will remain open until the deadline of 14 May 2019.

See below for a schedule of important dates.

Papers are invited including topics addressing:

- Design and construction solutions to foundation problems
- Innovative site investigation methods and techniques
- Ground improvement for structural support and retention works
- Testing of foundations
- Developments and innovations in construction equipment, methods and materials
- Potential environmental and structural impact of piling work on adjacent structures
- Case studies with lessons learned
- Structural, geotechnical and construction interaction for project success
- Infrastructure works projects from PPPs, government authorities, builders, consultants and contractors
- Effective specifications related to performance and materials

Submissions:

For more information, contact events@dfi.org.

Submit Abstract online at www.dfisubmissions.org using the Conference ID PFSF2020.

14 May 2019: Deadline for abstract submission

30 May 2019: Notification of acceptance

30 August 2019: Submission of draft papers

6 December 2019: Final papers due
